WOMENS

Our workwear fabric quality is the foundation of our brand. To ensure each garment we produce has exceptional durability and longevity we test our fabric to the wide range of testing criteria described here. We only approve the fabric to go into production if it meets our high standards. **We don't make claims we can't prove.**

AS/NZS 1906.4-2023 // RETRO REFLECTIVE MATERIALS AND DEVICES FOR ROAD TRAFFIC CONTROL PURPOSES - HIGH VISIBILITY MATERIALS FOR SAFETY GARMENTS

This standard specifies the chromaticity levels to which fabrics need to be dyed in terms of performance and atmospheric pressures in order to comply to the standard. Natural fibre garments have a lower chromaticity level due to the nature of the fabric.

Class F	Daytime fluorescent
Class R	Retroreflective material
Class RF	Retroreflective and fluorescent
Class NF	High daytime visibility NON Fluorescent

AS/NZ 4602.1.2011 // HIGH VISIBILITY SAFETY GARMENTS - GARMENTS FOR HIGH RISK APPLICATIONS

There should be no less than 0.2m² of unbroken hi visibility fabric on both the front and back of any garment that covers the upper torso. High visibility fabric must not be broken with non compliant fabric within the 0.2m² area from the top of the shoulders to the waist, so no full side panels at armpit level are permitted.

This standard also explains the position of the retroreflective tapes on the garment, the width and quantity used. These tapes should not detract from the 0.2m² measurement required.

Class D	Daytime use
Class N	Night time use using retroreflective material
Class D/N	Day/night use

Excessively large embroidery may jeopardise the classification of the high visibility safety garment. Embroidery on wet weather jackets may also impair the waterproofing properties of the garment. Please seek professional advice.

To most people, a safety garment is a safety garment. Orange or yellow, big or small, it's all the same. Not all hi vis safety garments sold in the market today comply to the latest Australian and New Zealand safety regulation for high-visibility garments 4602.1.2011.

Below are a few common examples of garments that would not pass the current 4062.1 2011 AU/NZ standard.

SHOULDER CONFIGURATION

- Compliant area of high visibility material.
- Compliant levels of fluoro chromaticity.
- Unbroken retroreflective tape in belt and brace configuration.

INCORRECT FLUORO AREA

Area of fluoro material should be no less than 0.2m² for front and back torso.

HOOPED CONFIGURATION

- Compliant area of high visibility material.
- Compliant levels of fluoro chromaticity.
- Unbroken retroreflective tape in hooped configuration.

BROKEN TAPE

Retroreflective tape must not be broken or have gaps.

BIO MOTION CONFIGURATION

- Compliant area of high visibility material.
- Compliant levels of fluoro chromaticity.
- Unbroken retroreflective tape in hooped configuration with Bio Motion arm taping for improved recognition of human shape at a distance.

NON-FLUORO FABRICS

Dyed fabrics must meet chromaticity levels to comply with standards.

X BACK AND BIO MOTION CONFIGURATION

- Compliant area of high visibility material.
- Compliant levels of fluoro chromaticity.
- X Back and Bio Motion taping for improved recognition of when a worker has their back turned from a distance.

DON'T RISK IT! MAKE SURE ALL OF YOUR GARMENTS ARE FULLY COMPLIANT TO THE AUSTRALIA/NEW ZEALAND SAFETY STANDARD.

HI VISIBILITY DAY ONLY

A garment that uses high-visibility materials for day use only. The high-visibility material encircles the upper torso. Complies with AS/NZ:

- 4602.1:2011 High-Visibility Safety Garment Construction Class D
- 1906.4:2010 High-Visibility Materials Class F

HI VISIBILITY DAY/NIGHT

A garment designed for day and night use using retroreflected light with high-visibility material encircling the upper torso. Complies with AS/NZ:

- 4602.1:2011 High-Visibility Safety Garment Construction Class D/N
- AS/NZS 1906.4:2023 - High Visibility Materials for Safety Garments

UPF RATING

Ultraviolet Protection Factor (UPF) - a rating designed for fabric and clothing that specifically measures the level of Ultraviolet Radiation transmitted through a fabric onto the skin. UPF measures both UVA and UVB rays. Complies with AS/NZ:

- 4399/2017 Sun protective Clothing Evaluation and Classification

BREATHABILITY

Garments that allow more air to pass through the fabric thanks to innovative fabric design and garment construction. This allows the wearer to stay cool, dry and more comfortable while on the job.

RIPSTOP TECHNOLOGY

Ripstop fabric provides increased tear and abrasion resistance through an innovative fabric weave. This weave allows the use of lighter weight fabrics to keep you cool while still maintaining a garment that will stand up to the tough jobs.

STRETCH FABRICATION

A garment that use fibres that will stretch with you to provide increased comfort and unrestricted movement.

ADVANCED KNEE PROTECTION

A garment with a knee pad provision and extra fabric reinforcing the knee area. This provides greater protection and comfort for those working on their knees.

CORDURA® REINFORCEMENTS

Cordura® is made from the highest tenacity fibre technology available. A garment with Cordura® reinforcements is built to last with exceptional resistance to tears and abrasion. Cordura® can withstand more than 3 times the wear of traditional workwear fabrics.

WATERPROOF

A garment that uses water resistant fabrics and coating to prevent water coming through the outside layer. All Syzmik waterproof garments are seamsealed to prevent water entering through the seams and ensure protection from the elements.

WATER RESISTANT

Durable water-repellent treatment helps shed light rain, keeping you comfortable in short showers.

ANTIBACTERIAL

Advanced built-in treatment that helps prevent odour-causing bacteria, keeping your clothes fresher for longer.

The right care and storage of your workwear is important for its durability, function and long term comfort.

Every garment has specific care instructions which are suited to the particular garment's material and design. Please always refer to your garment care label.

Always ensure that zips, buttons and quick close tape closures are closed when the garment is washed to reduce wear and tear.

RUGGED COOLING

**INTRODUCING RUGGED COOLING
- SYZMIK'S HEAT STRESS
MANAGEMENT RANGE THAT
INCREASES BREATHABILITY
BY OVER 110% WHILE ALSO
INCREASING TEAR STRENGTH
BY MORE THAN 70%.**

**LOOK OUT FOR STYLES
WITH THIS LOGO**

Heat Stress is the single biggest problem affecting our customers at work. Heat stress is not only uncomfortable but can result in serious injury or even death in extreme cases. Under the workplace health and safety act 2011 (AS) it is the legal obligation of employers to put plans in place to mitigate the heat stress risk.

Syzmik's Rugged Cooling range of work shirts and pants changes the way cool workwear is developed.

When we started to look for a better solution to heat stress we first had to understand the way the body cools itself which is primarily through the evaporation of sweat. So to aid the body in cooling, we set out to create a fabric that would increase breathability to not only keep the wearer cooler but also allow the body's sweat to evaporate and dry quicker.

The fabric we use is a 100% cotton, produced in a square weave construction that allows the maximum amount of air to pass through the fabric. Added features like extensive mesh venting and vented tape increases the breathability of our range even further.

We then set out to make our fabric more durable and developed a ripstop construction in the fabric which uses thick reinforcing thread through out to make the fabric stronger while not limiting the breathability.

The result of all this development is a range that is not only cooler and more comfortable but also actually stronger than traditional workwear.

**UNIQUE SQUARE WEAVE
FABRIC AND VENTING ALLOW
INCREASED AIR FLOW TO COOL
YOU DOWN WHILE THE
RIP STOP CONSTRUCTION
GIVES THE LIGHTWEIGHT
FABRIC MORE TEAR STRENGTH.**

SYZMIK STREETWORX

INSPIRED BY THE STREET.
DESIGNED TO WORK.

The Streetworx range is a whole new kind of workwear that has been made with freedom in mind. Why should your work clothes have to be different from your street clothes?

The Streetworx range has been designed to look as stylish as any street or fashion clothing but with the functionality and durability you need at work. With Streetworx you have the freedom of wearing the same clothes that you wear to work, to the gym, to the pub, skateboarding, bike riding anywhere you want.

The Streetworx range uses fabrics that give noticeable lightweight stretch so you can work with increased freedom of movement, no more splitting pants when bending down or feeling restricted when reaching overhead.

Freedom to move, Freedom to have your own style, Freedom to go anywhere. Syzmik Streetworx.

FIRE ARMOUR

A RANGE CREATED TO OFFER THE HIGHEST
LEVEL OF PERFORMANCE POSSIBLE.

AS WELL AS DELIVERING ON UNCOMPROMISING
PROTECTION, SYZMIK FIRE ARMOUR® FABRICS
SOLVE THE ISSUE OF HEAT STRESS AND COMFORT.

162

MODATech®
ORANGE FLAME RANGE

THE EXCLUSIVE
MODATECH® FABRIC
USED IN THE SYZMIK'S
FIRE ARMOUR^{ORANGE}
FLAME RANGE GIVES A
HIGH LEVEL OF INHERENT
HRC/PPE 2 - 10 CAL
PROTECTION IN A FABRIC
THAT IS LIGHT, SOFT AND
AMAZINGLY COOL.

FR clothing is needed to protect workers who may be exposed to the risk of fire or arc flash. If non FR clothing, such as cotton is worn when exposed to these risks it will increase the injuries suffered from the incident. Non FR clothing will continue to burn after the source of the flame has been removed at an increasing rate, until all flammable material is consumed.

The flame from the continued burning of cotton or other non FR clothing will often cause more intense burns than the original incident itself. Burning clothing will also cause injuries to areas of the body that had not been exposed to the original incident.

FR clothing's key characteristic is that it will self-extinguish when the source of the flame is removed. Good FR clothing should also resist ignition, not melt, drip or break open when exposed to fire or arc flash. These characteristics greatly improve the survival rates and outcomes of anyone exposed to arc flash or flash fire.

FR clothing will not prevent all injuries in the case of a flash fire or arc flash incident but they will significantly reduce the injuries and give the wearer an ability to escape the incident.

The **Burn Survival Rates** graph below illustrates the importance of minimising the severity of burns:

SUPERIOR COMFORT, INDUSTRIAL TOUGH

At Syzmik we understand that an FR garment has to be cool and comfortable enough to wear or workers will simply not wear it. To combat this we developed a fabric that provides outstanding moisture wicking characteristics in a light 250 gsm fabric that delivers high level HRC/PPE 2 – 10 Cal arc flash protection as well as ISO 14116:2008 and ISO 11612:2008 certified flame protection.

ONLY FR RATED COMPONENTS USED

All products use fully FR rated trims including reflective tape, snaps, buttons, zippers. Non FR rated closures can melt when exposed to flames, this makes the garment difficult to remove and puts the wearer at risk of greater injury.

DESIGNED TO MINIMISE EXPOSURE

The range has been designed to achieve minimal skin exposure so all products feature gusset sleeves.

GARMENTS CAN BE REMOVED QUICKLY

Garments have been designed to be quickly removed in case of emergency, with FR press studs on the shirts and an FR zipper on the overalls.

All measurements in this catalogue are approximate and are for reference only. This size chart is a guide only and sizing may vary according to the style, fabric and fit of the actual garment. Waist specifications are measured at the natural waist which is to be considered even though garments will generally fit lower. For garment sizing reference, please visit www.syzmik.com
